

# GeneJet's Visions

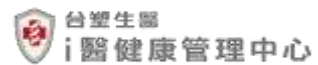

Healthcare industry covers clinical care, medical device, and biotechnology pharmaceutical. With the rising of genome, big data, AI, digital healthcare and IOT, they recreate the new face of healthcare mode and research and development of medical device.

our company seize the chance to import innovation services, carry out novel R&D, so that we grow steadily and continuously .

Form alliance  
Connecting the ecological  
chain of the biomedical industry

# GeneJet's Solution

## POCT

Fast · Precise · Convenient · Compatible

Traditional “out-of-hospital” or “centralized” test method cannot match the clinical need of “Instant result, accurate diagnosis, giving necessary treatment in time”.

Thus, GeneJet develops whole new omni-care of POCT service mode, without complicated samples management. Through a handy detector, it allows you to generate test results at once, further speed up the reform of modern medical treatment.

### Maternal and Fetal Health/Solution

Chlamydia nucleic acid screening, to prevent maternal-fetal infection; Hepatitis C nucleic acid detection, to prevent maternal-fetal complications; Deafness drug genetic testing, to avoid severe deafness in newborns

### Child Health/Solution

Enterovirus nucleic acid detection, rapid report, accurate classification, precise treatment; Noro, rotatable, EB virus rapid analysis, differential diagnosis, prevention of abusive antibiotics

### Drug Genes/Solution

Rapid analysis of drug metabolizing enzyme genotypes, individualized drug evaluation, clinical guidance on the selection of drug types and dosages, and avoid drug-derived side effects and comorbidities

### Preventive Medicine/Solution

Alcohol metabolism, obesity, hormonal drug metabolism gene testing, etc., provide personalized, all-round gene guidance.
